Click to view fullsize Article continues below... 1.2 BILLION USERS & FAST GROWTH The Autodesk document-creation software market has grown to be a \$1.2 billion USD industry by year end 2018. By the end of 2012, AutoCAD's sales had grown to over \$750 million USD, and at the end of 2017, AutoCAD was a \$1 billion USD software application. As of the third quarter of 2018, AutoCAD had grown to approximately 19 million total users, as estimated by the Market Share of CAD Software study by Gartner, Inc. The study finds that Microsoft Office's product suite, including Microsoft Office Professional Plus, is estimated to have sales of approximately \$13 billion USD in 2018. This growth is partly due to AutoCAD's feature set, and its customer base. Some of AutoCAD's features include: The complete engineering package for 2D and 3D design; Digital drafting, including layup, design, schematic, and mechanical design; Optical and electromagnetic design and analysis; A powerful parametric modeler with advanced tools for multidisciplinary collaboration; Precision measurement and modeling; Import, export, and publish vector and raster files; Charting and reporting; Wireframe and animation tools; Over 16,000 objects, including solids, surfaces, 3D shapes, and dimensions; 3D modeling and rendering; PCM modeling and animation; Thin sections, contour lines, and isometric surfaces; and Multi-user collaboration features. AutoCAD's emphasis on collaboration features has helped it become the most popular desktop product on the market. In addition, the company claims that the number of users who indicate that AutoCAD is the only software that they use has grown to over 20% from 2013. With the inclusion of more and more features, AutoCAD is used for many industries. The Aerospace and Defense (A&D) segment of the market currently represents approximately 45% of the total segment, followed by Machinery and Mechanical (40%) and Architectural (12%). It is estimated that the market will grow at a compound annual growth rate (CAGR) of 2.8% for the period from 2013 to 2018, reaching approximately \$2.4 billion USD
