RIGS LOOKS A BIT MORE WELCOME FROM THE WIDE VIEW POWER-UP GRANDEUR AND YOU CAN LEARN MORE ABOUT THE GAME ON THE OFFICIAL NINJA RACING FORUM! The game is powered by MotionXChange and the official scoring is done by Robotrader.net RIGS IS THE FIRST NEO BLOOD HOMAGE TO THE NEO BLOOD MERKERS Credits Info Here's a little bit about the project that started it all. Many of the artwork is by Eroth. Astro Nova was founded in October of 2006 to create another classic racing game in the same vein as the classic NEO BLOOD games. We call it a NEO BLOOD

homage, but it's more accurate to call it the first NEO BLOOD homage because NEO BLOOD: Falconers began as an homage to the NEO BLOOD series. Originally going to be released as a free v2.0 game for the Mac, the project was later changed and opened up for other platforms. The game is intended for ages 18 and older and features adult content. Our goal is to make the game a fun, challenging, and rewarding game for people of all ages and skill levels. On that note, we hope you enjoy the game for what it is. NEO BLOOD: RIGS is our first game in the NEO BLOOD series, and it should be our last. What we hoped to achieve with this game is pure art. When we set out to make this game, there was only one image that came to mind, and that was the image of Scott Hansen racing against Stitch Blood. It is the goal for all of us at Astro Nova to emulate the look and feel of the classic NEO BLOOD games that we love. We hope you enjoy the game as much as we enjoyed making it. Cheers! TECHNICAL DETAILS: - Windows Vista/7 - Mac OSX 10.4+ - OpenGL 2.1+ - Latest DX9 version of UnrealEd - Latest and greatest games - Requires a 1750x1024x8bpp display on high-end cards and a 1024x768x8bpp display on low-end cards - Full-screen windowing supported for high-end cards - Auto-save at save

- NO STUFF! No in-game advertising, no crazy pop-up advertisements or sales, just pure fun :) It's a futuristic game set on Mars where you play a guy who is trying to escape from a spaceship crashing on Mars. But the longer you play, the harder will be the "Mars-virus". And the more tricks this virus will have to throw at you. ;) How to play: - The game has a turn-based strategy interface.
- The game ends when your next move cannot improve the level of virus infection. - You can set

pause to Pause the game for longer turn-based strategy sessions. - You can make hot-swap between your turns by pressing A/D or up/down. - To close the game press Esc or click the game icon in taskbar. - You can also send a tweet to @tetrotronvr with no response from me ;). - You can read all feedback and suggestions on this comment! - Please contribute in rating and making the game even better. Your feedback is very important :) You can play it in the following modes: - Training: just train your skills while not worrying about virus being infected. - Endless mode: game ends when there is no more virus to infect - "Finish Line" mode: game ends when your next move is going to finish your planet (this is optional). Terms of Use: - I require you to like, share, comment and follow me. - The game can be played on all systems (Windows/MAC/Linux). - Please message me if you notice any bugs. I'm very responsive :) - Your supported platform will depend on your OS, not by this game. - I can't change the virus levels, but I can change the map. - If you don't agree with the terms, stop playing TetrotronVR, sorry about that. Thanks for your support!
